

Online Seminar on “**Farm Outlook and Price Risk Management**”

Monday November 23, 2020 from 4.00 p.m. to 5.30pm.

Dear Sir/ Madam,

Agriculture accounts for nearly 16 percent of the country's GDP and employs more than 50 percent of the workforce. Yet, it operates under multiple challenges in production, processing, marketing and trade. Risk, including price risk, is an integral part of agriculture. Recent agri-market reforms are designed to reduce market-related risks and tools for risk management are available .So, there is a compelling reason to engage in risk management education.

India is a large producer of several commodities and has a long history of commodity trading. There are different (global and domestic) drivers of the commodity market which impact prices. By their very nature, commodity markets are volatile. Therefore, it is necessary to manage their price risks through hedging which is an insurance against adverse price movement. Commodity derivatives have also emerged as an investment vehicle.

In this background, IMC Chamber of Commerce and Industry (through its Expert Committee on Agriculture and Food Processing and IMC-Economic Research and Training Foundation) is organizing an Online seminar on “Farm Outlook and Price Risk Management” on Monday, November 23, 2020 from 4.00 pm to 5.30 pm. IMC is a SEBI-accredited training institution for commodity derivatives.

The virtual meeting will be on Zoom. There is NO Participation Fee; but registration is necessary. On receiving a registration request, VC details will be provided. For registrations and other details please contact Ms. Anita Naik at anita.naik@imcnet.org or visit IMC website <https://www.imcnet.org/events-924>.

We do hope you will be able to seize the opportunity and participate on November 23, 2020. It will be a knowledge enriching experience.

Ajit Mangrulkar
Director General
