e) Potential products of imports from India

S.No.	Commodity (6 digit HS tariff line)	Rationale (Max.200 words)
1.	300490 - Medicaments in measured doses	Kazakhstan imports a large share of its pharmaceutical products due to limited domestic manufacturing capacity. Medicines are among the significant non-energy import categories in the country. India is one of the world's leading producers of generic pharmaceuticals and supplies competitively priced medicines to many global markets. India already exports pharmaceutical products to Kazakhstan, including medicaments containing antibiotics and other therapeutic formulations. However, the market remains dominated by suppliers from the EU and Russia, leaving room for Indian companies to expand their presence. Increased cooperation between distributors, hospital procurement systems, and public tenders in Kazakhstan could further support the expansion of Indian pharmaceutical exports.
2.	870899 - Parts and accessories of motor vehicles	Kazakhstan's growing vehicle fleet and expanding logistics and mining sectors generate strong demand for vehicle spare parts and accessories. While the country has some vehicle assembly operations, most components are imported due to limited domestic manufacturing capacity. India has a well-developed automotive component industry that exports parts to global original equipment manufacturers and aftermarket distributors. Competitive pricing and large manufacturing capacity provide opportunities for Indian suppliers to increase exports of spare parts to Kazakhstan, particularly for aftermarket service networks and vehicle maintenance sectors.
3.	100630 - Semi-milled or wholly milled rice	Kazakhstan imports rice varieties not widely produced domestically, particularly basmati and premium rice varieties. India is the world's largest rice exporter and dominates global basmati trade. Indian rice is already well known in Central Asian markets due to diaspora consumption and competitive pricing. There is further potential to expand Indian rice exports in Kazakhstan through retail chains, wholesale distributors, and the food service sector, particularly for premium basmati rice used in restaurants and catering.
4.	847130 - Portable automatic data processing machines (laptops)	Kazakhstan's digital transformation policies and expanding IT sector have increased demand for computers and related equipment. Most IT hardware used in Kazakhstan is imported. India has been expanding its electronics manufacturing sector through initiatives such as "Make in India" and

		production incentive schemes, increasing export capacity for electronic devices. While China currently dominates the market, diversification of supply chains may create opportunities for Indian manufacturers to supply laptops and other computing equipment to Kazakhstan's government, education, and private sectors.
5.	090240 - Black tea (fermented)	Tea is widely consumed in Kazakhstan, which imports the majority of its tea supply. India is one of the world's largest producers and exporters of tea, including well-known varieties such as Assam and Darjeeling. Indian tea already has a presence in Kazakhstan but faces strong competition from Kenyan suppliers. There remains potential to expand Indian tea exports through stronger branding, distribution partnerships, and retail promotion in Kazakhstan's growing consumer market.

a. Significant trends in trade and investment (Sources: Committee of State Revenues of the Republic of Kazakhstan)

S.No.	Category	Details of significant trends (Max.200 words)	Analysis (Max. 200 words)
1.	Trade in Goods	In December 2025, Kazakhstan's imports from India were dominated by pharmaceutical products, machinery, consumer electronics and agricultural goods. The largest import item was 300490 – Medicaments in measured doses, valued at USD 10.5 million (105.6 tons), accounting for 5.21% of Kazakhstan's total imports of this commodity. The	The December trade data show that Kazakhstan mainly exports raw materials and metals to India, while importing manufactured goods and consumer products from India. Pharmaceuticals remain the largest category of Indian exports, with several pharmaceutical products appearing among the top imports.

		second-largest import was 300420 – Antibiotic medicaments, amounting to USD 2.9 million (141.5 tons) with a 19.86% share. Consumer electronics also appeared among major imports, with 851713 – Smartphones reaching USD 2.5 million. Agricultural products remained significant, with 090240 – Black tea valued at USD 1.9 million, representing a notable 29.68% share. Mining and construction machinery such as 842959 – self-propelled excavators and loaders reached USD 1.7 million, reflecting continued activity in Kazakhstan's extractive industries. Other imports included alkaloid-based medicaments (300449), X-ray medical apparatus (902214), iron and steel articles, grinding balls for mills, and unmanufactured tobacco. Kazakhstan's exports to India remained concentrated in silver (USD 17.6 million), phosphorus (USD 15.4 million) and titanium products (USD 2 million), followed by ferro-chromium and other industrial raw materials.	This reflects India's strong position in the global market for generic medicines. The presence of smartphones and medical equipment among the imports suggests that Indian exports are gradually expanding into technology and healthcare products. Imports of mining machinery and grinding balls indicate continued demand from Kazakhstan's mining and metallurgical industries. On the export side, Kazakhstan mainly supplies precious metals and industrial minerals used in manufacturing. Overall, the data suggest further potential to expand Indian exports in pharmaceuticals, machinery, medical equipment and electronics, while Kazakhstan could increase exports of minerals and metals used by India's growing industrial sector.

4. Important India related statements of commercial significance by political leaders, think tanks, chambers, associations etc. / Significant stories/features on India related trade, investment, services and logistic sector, published in foreign journals/dailies, etc.: (Max. 500 words)

On 23 December 2025, the Ambassador of Kazakhstan to India Azamat Yeskarayev held a working meeting in New Delhi with India's Deputy Minister of External Affairs Sibi George to review the results of bilateral cooperation in 2025 and discuss further opportunities for expanding trade and economic relations between the two countries. The discussion focused on strengthening cooperation in areas such as trade, investment, and broader economic engagement.

Regional media and analytical commentary also noted the growing importance of economic cooperation between India and Central Asian countries. According to analysis published in December 2025, trade between India and Central Asia has significant potential for growth and could exceed USD 10 billion in the future, reflecting the strategic importance of the region for India's trade and connectivity initiatives.

Overall, the coverage in Kazakh and regional media during the period highlighted continued interest from both governments and business communities in expanding India-Kazakhstan economic cooperation, particularly in trade diversification, investment opportunities and regional connectivity initiatives.
