1.	10.02.2025	Technical Regulations			Draft amendments to the technical regulations of the Eurasian Economic Union "On the Safety of Amusement Rides" and "On the Safety of Gas Appliances" have been approved for public discussion. Changes to the technical regulation on amusement rides are related to the establishment of forms, schemes and procedures for conformity assessment based on model conformity assessment schemes. As for the technical regulation for gas appliances, the changes are

				caused by the fact that equipment intended for use in interior spaces and premises must necessarily be equipped with a device that prevents the accumulation of unburned gas.
2.	18.02.2025	Technical Regulations		The Eurasian Economic Commission's Board has amended the Rules for classifying medical products depending on the potential risk of use. According to these amendments, antiseptic wipes for cleaning the hands of medical personnel, operating and injection fields will now be classified as risk class 2a. This rule was also applied to ethyl alcohol wipes. But since in this case ethyl alcohol only performs the antiseptic function, respectively, there are no risks that exist when using medical products with medicines.
